

## High performance Ferrite sheets (PE72) For EMI suppression

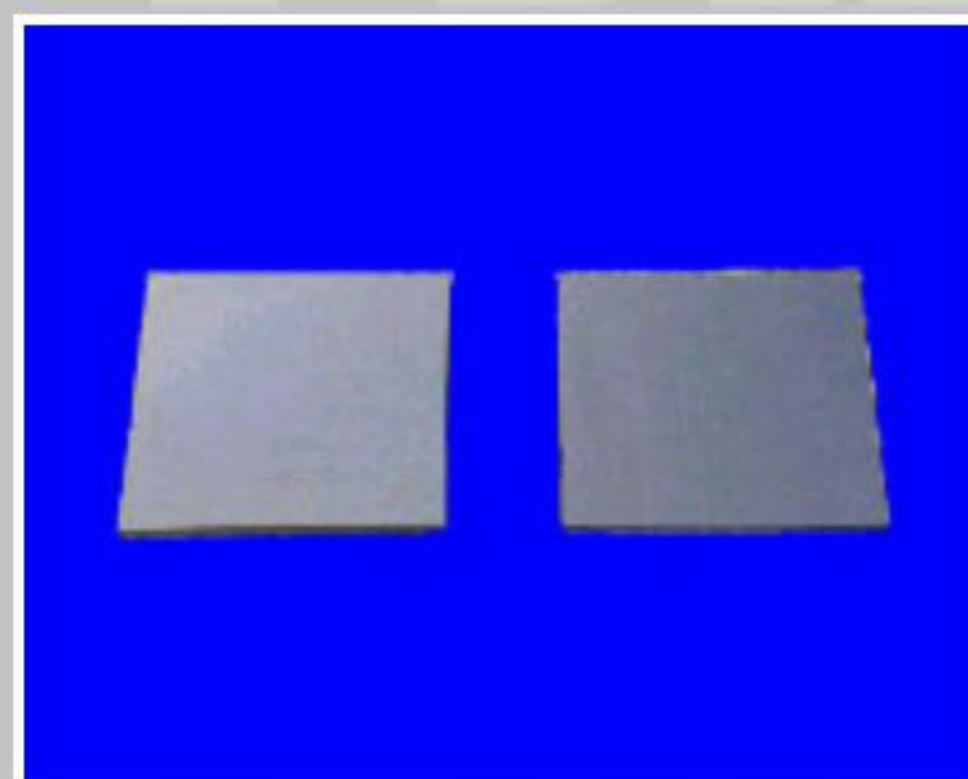

FDK noise suppression sheets are based on high-quality materials technology, high frequency evaluated technology and simulation technology fostered by radio wave absorbers used in microwave multiple radios, and have excellent properties not seen in those of other companies.

### Technical Points

- Noise suppression measures
- Heat conductivity
- Flexibility

### Application

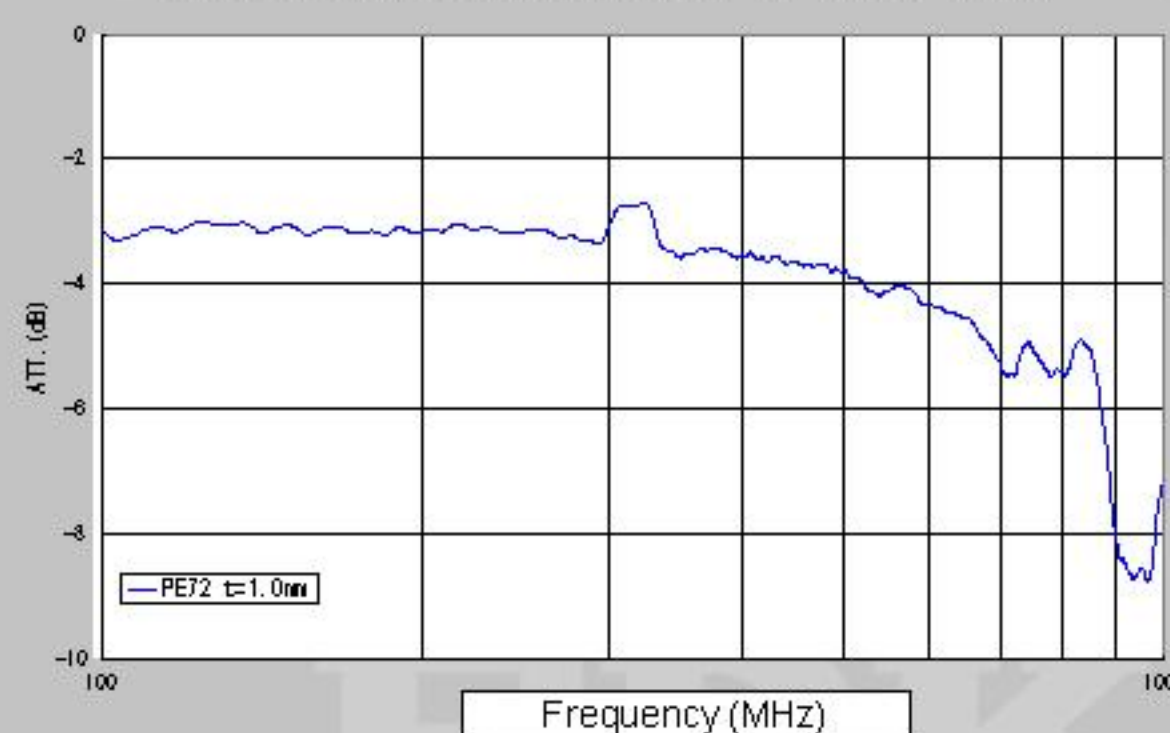

- Electronic games
- Notebook PC
- e.t.c

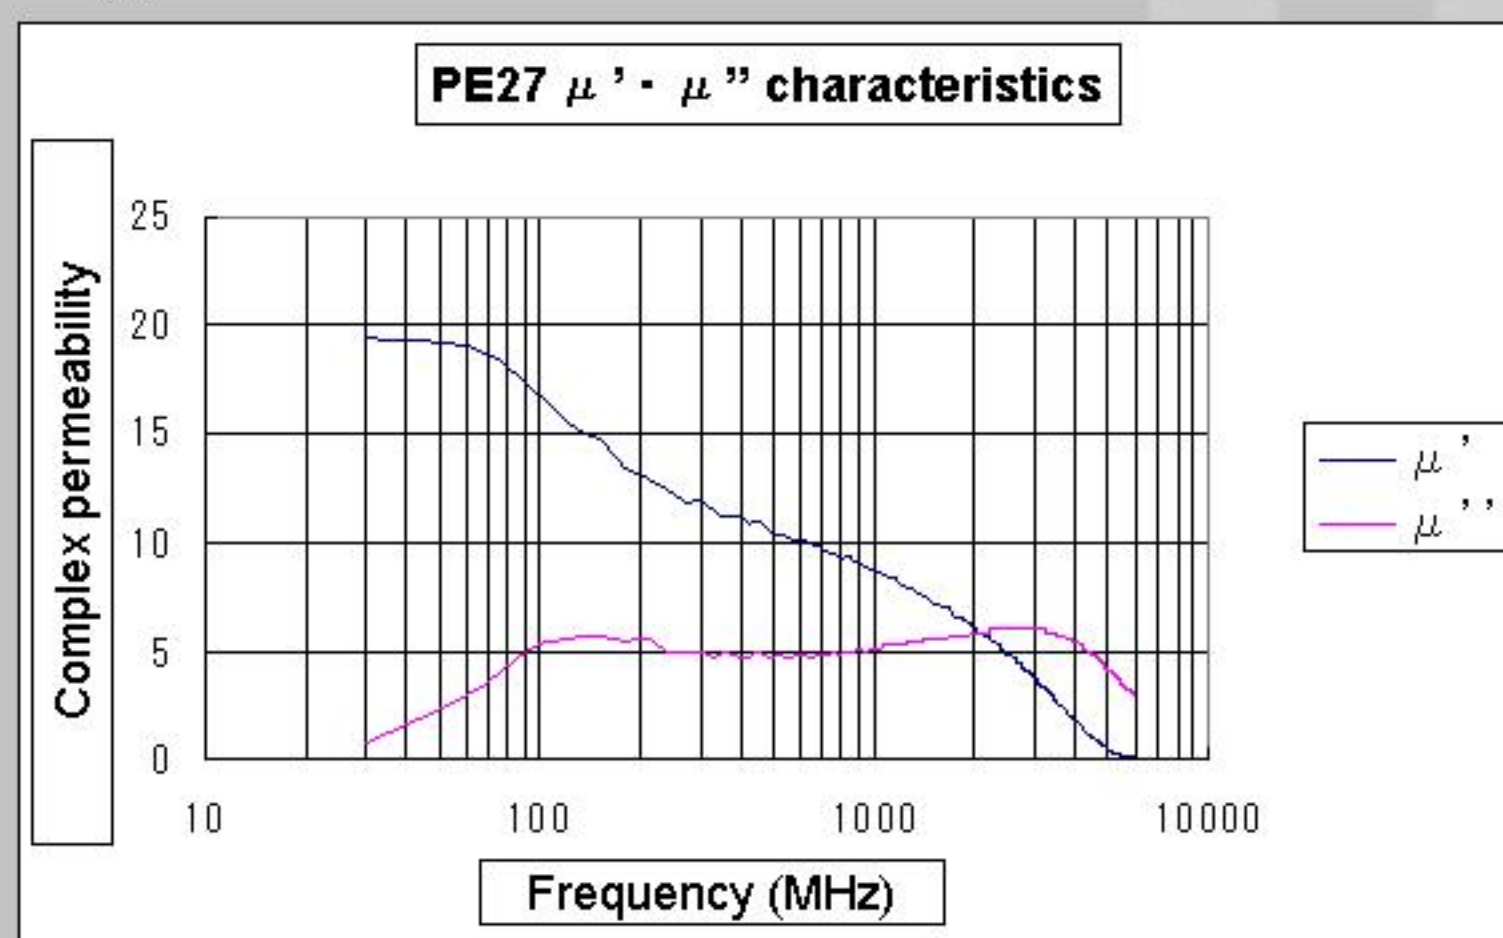

### Characteristics

Material	PE72	
Initial permeability ( $\mu$ iac)	20	
Density ( $\text{kg/m}^3 \times 10^3$ )	3.0	
Operating temp. ( $^{\circ}\text{C}$ )	-30~+100	
Shape	Sheet	297×210mm
	Roll	200mm×15m
Thickness	0.25mm·0.5mm·1.0mm	

### Decoupling performance in near field

### Magnetic Characteristics
